Interoperability:
The NextGen Healthcare Advantage

NextGen Healthcare is a worldwide leader in healthcare data exchange and optimization. Naturally averse to siloed data and the unwanted consequences it can have on better patient outcomes, our fully automated interoperability infrastructure communicates with Epic across several clinical and administrative use cases.

Use Case	Exchange Mechanism	Cost
Referrals, admissions, discharges, consults	Direct messaging through NextGen Share. Supports CCDA, PDF, images, notes, etc.	**FREE** with NextGen Share
Pre-visit planning, query, & retrieve of data	Carequality & Surescripts Record Locator and Exchange	**FREE** with NextGen Share
Admits, Discharge, Transfer (ADT)	HL7 ADTs exchange bi-directionally	**$**
Orders & results	Labs, radiology, surgical orders = HL7 interfaces	**$**
Demographics sharing	HL7 ADTs, or brokered through a local HIE	**$**
Document exchange (chart notes, visit histories, longitudinal record pull, etc.)	Many options including Carequality, Direct Messaging, HIE	**FREE to $** depending on options chosen

Benefits of NextGen® Share

NextGen Share plugs you into a national data exchange and provider network to see a holistic view of the patient. Streamlined patient information exchange enables you to integrate and move data across systems and locations.

Access clinical records

Reduce burdens associated with manual medical record request processing with NextGen® Share eChart Extraction Service, which automates data retrieval for payer and life insurance partners—all within your workflow.

View patient records in real time

Gain real-time access to millions of patient records across billions of encounters with Carequality.

Perform electronic referrals

Join the community of clients who have sent and received hundreds of millions of Direct messages through NextGen Share. These electronic referrals, built into the workflow, optimize referral management and eliminate the need to send faxes.

Conduct automated submissions to clinical registries

Meet the Public Health Reporting measure for MIPS and Medicaid while promoting interoperability and specialty registries through NextGen Share.

"One of the great things about Direct Messaging and NextGen Share is that it does not matter who the hospital or medical group is, what operating system they're using, or what EHR or EMR they're using— Direct messaging comes standard."
