

FOR IMMEDIATE RELEASE

MEDNAX, INC. EXPANDS USE OF NEXTGEN[®] TECHNOLOGY

National group practice aims to further increase efficiencies for its providers by adding NextGen EPM

Horsham, Pa. – March 9, 2009 – NextGen Healthcare Information Systems, Inc., a wholly owned subsidiary of Quality Systems, Inc. (NASDAQ: QSII) and a leading provider of ambulatory healthcare information systems and connectivity solutions, today announced that MEDNAX, Inc., a national physician group practice, is expanding its use of NextGen Healthcare's enterprise software solutions to include the NextGen EPM (Enterprise Practice Management) product. Pediatrix Medical Group, now a part of MEDNAX, has been utilizing the NextGen EHR (Electronic Health Records) product for its office-based practices since 2001.

Physicians practicing as part of MEDNAX specialize in neonatology, maternal-fetal medicine, pediatric cardiology, pediatric intensive care, pediatric and OBGYN hospitalist services and anesthesiology. The combined strengths of the NextGen EPM and NextGen EHR products promote increased efficiency by allowing providers to share information nationwide through a uniform platform. NextGen EPM allows healthcare organizations with multiple locations to centralize appointments, billing, collections and other business processes. The NextGen EHR product provides access to specialty-specific and disease management templates, charts and lab results, e-prescribing with pharmacies, health maintenance alerts, medication recalls, and more.

"We've had great success utilizing the NextGen EHR product during the past eight years and are confident that the NextGen EPM system will provide similar efficiencies," said Bob Bryant, senior vice president, chief information officer, for MEDNAX. "By utilizing both products, we're aiming to improve clinical and administrative data sharing for our providers. Our organization includes providers across the country, so it's very important for them to be able to exchange information regarding a patient's health record or to access billing information for services rendered."

About NextGen Healthcare

NextGen Healthcare Information Systems, Inc. a wholly owned subsidiary of Quality Systems, Inc. (NASDAQ: QSII), provides integrated electronic health record and practice management systems, connectivity solutions, and billing services for hospitals and ambulatory practices of all sizes and specialties. About MEDNAX, Inc.

MEDNAX, Inc., is a national medical group that comprises the nation's leading provider of neonatal, maternal-fetal and pediatric physician subspecialty services as well as anesthesia services.

Physicians and advanced practitioners practicing as part of MEDNAX are reshaping the delivery of care within their specialties and subspecialties, using evidence-based tools, continuous quality initiatives and clinical research to enhance patient outcomes and provide high-quality, cost-effective care. Pediatrix Medical Group, a unit of MEDNAX, was founded in 1979 and now includes neonatal physicians who provide services at more than 250 neonatal intensive care units, who collaborate with affiliated maternal-fetal medicine, pediatric cardiology and pediatric intensivist physician subspecialists to provide a clinical care continuum. Pediatrix is also the nation's largest provider of newborn hearing screens. MEDNAX, through its affiliated professional corporations, employs more than 1,200 physicians in 32 states and Puerto Rico. Additional information is available at www.mednax.com.

This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company's future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; uncertainties concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods' financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems' periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company's quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company's revenues and operating results are very difficult to forecast. A major portion of the Company's costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company's period-to-period financial performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company
