

Hospitals: Your Path to Continuity

Across Care Settings

Achieving a New Level of Care Across the Continuum

Healthcare providers have long assured patients they offer comprehensive, lifetime care – from nose to toes, and cradle to grave.

What's been missing from the equation is continuity. Various providers in the community – all thorough in their own right – have lacked the tools to coordinate efforts and insight across the continuum of care.

That's no longer the case. NextGen Healthcare offers powerful clinical, financial, and administrative solutions to support continuity across care settings – from inpatient to ambulatory, small to large facilities, and everything in between.

Take a look at what else the NextGen portfolio of software and solutions has to offer hospitals and communities.

NextGen Solutions Benefit the Whole Community

The NextGen portfolio of solutions provides distinct advantages to all participants in all parts of the healthcare community.

Hospitals. Enables hospitals and health systems to access, share, measure, and report on clinical and financial information in order to:

- Help your EHR strategy meet Meaningful Use compliance criteria, and provide a secure and auditable platform.
- Advance growth strategies and strengthen physician affinity.
- Improve patient safety and quality of care with a consolidated patient record to speed diagnoses, coordinate care, streamline orders, and reconcile medications across locations and specialties.
- Enhance patient satisfaction.
- Allow for 'anytime/anywhere' access of critical patient data by easily pushing information beyond the four walls of the hospital in a secure fashion.
- Simplify accurate quality reporting and disease management tracking, leading to more effective and efficient care delivery.

Practices. Allows access to patient information and current updates, enabling physicians to:

- Coordinate patient care on a larger, more effective scale.
- Serve both patient safety and patient satisfaction objectives.
- Improve productivity with streamlined clinical workflow and convenient electronic communications for consultations, referrals, and patient interactions.

- Simplify reporting from a consolidated database of patient information, captured as discrete data to advance accurate performance analysis and reporting.

- Facilitate successful adoption of the patient-centered medical home (PCMH) model.

Patients. More patients are taking an active role in their healthcare, and are interested in greater access to healthcare services and information about their care options. Through NextGen solutions, patients are given convenient channels to learn and communicate about their care.

Patients also benefit from caregivers who can access current, updated medical records to:

- Better manage chronic conditions and preventive services.
- Improve the safety and quality of care.
- Minimize the inconvenience and expense of unnecessary duplicate testing.
- Reduce the risk of medications errors or interactions.
- Contribute clinical information to a patient's Personal Health Record by automating the creation of a Continuity of Care Document.

NextGen Portfolio Offers the Whole Package

With discrete data capture, compliance with emerging standards and requirements, and advanced functionality, NextGen Healthcare delivers the total package for sharing information across the healthcare community – with assurances that data integrity will be maintained and workflow streamlined. Our solutions offer a flexible and seamless approach to the emerging standards of care delivery.

Services

NextGenSM Practice Solutions

A 57-hospital client health system in 14 Eastern states connects its physician community with NextGen Healthcare solutions.

NextGen Inpatient Clinicals

NextGen Clinicals version 2.3 is a CCHIT Certified® 2008 Inpatient EHR*, that has been time-tested by over 20,000 users in hospitals everywhere. Scalable and secure, it resides on a 2nd generation, truly web-based enterprise platform. Integrated clinical applications – designed to improve care, increase efficiency and communication, and reduce errors and time-to-chart – include:

- NextGen Computer Physician Order Entry (CPOE)
- NextGen Clinical Data Repository
- NextGen Clinical & Physician Documentation
- NextGen Medication Administration
- NextGen Order Management
- NextGen Physician Portal
- NextGen Mobility
- NextGen Laboratory Information System
- NextGen Pharmacy Information System
- NextGen Therapy Management
- NextGen Radiology

NextGen Inpatient Financials

A proven financial and administrative system, NextGen Financials is a fully integrated, feature-rich solution that is both highly secure and easy to use. Applications include:

- NextGen Master Patient Index, ADT, and Registration
- NextGen Patient Accounting
- NextGen General Ledger and Budgeting
- NextGen Accounts Payable
- NextGen Fixed Assets
- NextGen Materials Management
- NextGen Executive Decision Support

NextGen Ambulatory EHR

NextGen Healthcare's EHR version 5.6 is a CCHIT Certified® 2011 Ambulatory EHR, additionally certified for Child Health and Cardiovascular Medicine with Advance Reporting. Our award-winning EHR offers unique features that set it apart from other systems:

- Clinical Content (25+ specialties)
- Coding Optimization & Compliance
- Disease Management
- Health Maintenance
- Lab/Device Connectivity
- ePrescribing/Medications Module
- Image Management
- Referral Management
- Reporting

NextGen Patient Portal

While offering standard features such as appointment requests, prescription renewals, and transmission of documents and forms, NextGen Patient Portal reaches far beyond other portals:

- Patient information, including referrals, can be imported directly into NextGen Ambulatory EHR, minimizing data entry at the front desk.
- Automated interviews through integrated technology allow patients to complete their own history prior to the physician encounter.
- Disease and health management plans can be customized based on the patient's input via the Web and monitored by the provider.

*CCHIT Certified® is a registered mark of the Certification Commission for Health Information Technology.

A 36-hospital health system in 10 states with 20 specialties serving roughly 4 million patients connected its enterprise with NextGen Healthcare solutions.

NextGen Health Information Exchange (HIE) *formerly Community Health Solution*

A highly secure data exchange and repository that stores, displays, and exchanges complete patient records, NextGen HIE allows a community with practices using EHRs outside the NextGen Healthcare enterprise to easily exchange community data. A core system feature is its comprehensive security model and audit trail that prevents unauthorized use and provides visibility into user transactions. Readily scalable, NextGen HIE relies on the latest interoperability standards to exchange clinical data and workflow processes, improving speed and accuracy, while creating closer service ties between and among:

- Hospitals
- Physician practices
- Labs and pharmacies
- Radiology and imaging
- Health Information Exchanges

NextGen Practice Management

To maximize efficiency and workflow, NextGen continually adds advanced features and functionality unique to its Practice Management system such as:

- WorkLog Manager, which monitors and instantly responds to events by sending tasks in real time to designated staff members.
- Instant productivity transparency, by tracking completed and outstanding tasks to measure operations and performance.
- Labor-intensive reports and business tasks that can be scheduled to run automatically at a specified – non-peak – time.
- Provider-based billing capabilities, not available with most systems, that facilitate increased reimbursement and greater physician integration.

NextGen Practice Solutions

With the bottom line rapidly eroding, the majority of hospitals and medical practices are seeking forward-looking business expertise. With NextGen Practice Solutions as your business solutions partner, we'll help leadership:

- Analyze the current revenue cycle to determine issues that may be hindering cash flow and growth.
- Create workflow processes to streamline operations and reduce expenses.
- Align business office requirements with clinical activities.
- Identify specific examples of missed revenue.
- Educate staff about error trends and process improvements.

Connecting With a Leader

NextGen Healthcare Information Systems, Inc., a wholly owned subsidiary of Quality Systems, Inc. (NASDAQ: QSII), provides clinical, financial, HIE, and revenue cycle management solutions for hospitals and ambulatory practices of all sizes and specialties.

As a leading provider of HIT solutions serving a wide range of healthcare organizations, we've earned our fair share of industry recognition and client awards over the years. Here are but a few:

- HIMSS® Davies Award of Excellence recognizing excellence in the implementation and value from health information and EHRs.
- #3 on the Forbes Best Small Companies in America.
- MS-HUG 2007, 2008, 2009, 2010 Innovation Award, and earlier Best in Class awards.
- *BusinessWeek* Hot 100 Growth Companies.

If yours is one of the forward-looking healthcare organizations ready to transform the concept of Meaningful Use into reality, and the theory of connected healthcare in practice, call NextGen Healthcare about our portfolio of products today.
