

NextGen for

Family Practice and Primary Care

You Are Here.

Recording patient data in paper charts is labor-intensive and inefficient. Valuable physician time and resources are consumed by completing routine exams, reports, and referrals. Daily documentation is a laborious task, and transcription is expensive. Precious time is exhausted pulling charts and responding to telephone inquiries.

You Could Be Here.

Destination — Future-Focused Medical Practice

Electronically documenting patient encounters. Reducing chart-pulls, dictation, and transcription, along with their associated costs. Coding at the highest level possible for maximum reimbursement. Ordering and reviewing tests and lab results with a few simple clicks. Finishing your day with prescription refills completed and telephone inquiries addressed. Leveraging technology to manage your practice and your patients' health comprehensively.

So How Do You Get There?

NextGen — Empowering Physicians with Fully Integrated Technology

NextGen Healthcare provides powerful electronic health records and practice management software designed to accommodate the unique needs of family and primary care practices. NextGen® Ambulatory EHR and NextGen® Practice Management software can be implemented as a fully-integrated solution or as stand-alone applications. Either way, you will benefit from our extensive knowledge of family practice and primary care. Live in hundreds of practices nationwide, the NextGen® system is designed to meet your unique clinical and administrative needs. We also offer comprehensive training and support services to ensure a successful implementation.

NEXTGEN
HEALTHCARE

NextGen Benefits for Family and Primary Care Practices

Exclusive family practice knowledge base content, designed by working with primary care and family physicians nationwide.

Features include:

- Simple point-and-click interface for documenting even the most complex visits, including multiple chief complaints
- Powerful disease management and health maintenance modules
- More than 4,000 built-in, printable patient education materials
- Integrated point-of-care clinical decision support from ACP PIER and Isabel
- Quickly generate and order prescriptions electronically, and also check for harmful drug and allergy interactions

Point, Click, and Document

NextGen Ambulatory EHR software features the industry's richest family practice knowledge base, built from years of experience working with physicians nationwide.

- Provide cutting edge, comprehensive disease management for your patients with templates designed to treat many diseases, including diabetes, hypertension, asthma, ADHD, and coronary artery disease. NextGen Ambulatory EHR software utilizes the latest in disease management protocols to provide effective, timely care
- The health maintenance module allows you to monitor tests and diagnostics that your patients need at regular intervals and inform them when they are due
- NextGen Ambulatory EHR software's unique browser design allows you to document multiple complaints rapidly, from the common to the most complex. From HPI to patient checkout, NextGen software has been intuitively designed to match your workflow

Improved Efficiency

NextGen Healthcare recognizes the value of your practice's time, so NextGen Ambulatory EHR software was built from the ground up to maximize your office's efficiency. NextGen Ambulatory EHR software's embedded Web browser enables you to access powerful decision support tools from ACP Pier and Isabel—all at the point of care.

- Order, track, and review labs and diagnostic tests with just a few clicks
- Notes and document generator extracts and formats available patient data into a standardized report, reducing the need for dictation and transcription
- Electronic prescribing allows you to order and renew prescriptions with a few simple clicks, saving time for you and your patients
- Access to patient data anytime, anywhere. Whether at the hospital, an outreach clinic, or your home, NextGen Ambulatory EHR software allows access to your records beyond the point of care

Enhanced Patient Communication

- NextGen® Patient Portal, our secure patient Web portal enhances your practice's communication with patients. Patients can view their medical records online, update their personal information, and even register before they visit your office
- Access more than 4,000 printable patient education materials on the latest diseases, medications and treatments, and provide your patients with a customized, at-home reference guide
- Manage telephone calls from one screen. Use triggered tasks to create "to-do" lists for each doctor and staff member in your practice

Streamline Office Administration

Award winning NextGen Practice Management software streamlines patient appointment scheduling, registration, billing, collections and reporting processes. The point-of-entry claims scrubber verifies that claims are completed accurately BEFORE submission, dramatically reducing claim denials. The system's exclusive WorkLog Manager enables administrators to assign tasks to practice personnel or to NextGen Practice Management software for auto-completion, allowing you to manage your practice while realizing a significant return on investment.

NextGen Practice Management software:

- Presents actionable tasks, via the WorkLog Manager, that tell staff what to do, when to do it, and, best of all, how to do it. The WorkLog Manager also measures whether the tasks were completed
- Supports HIPAA transaction sets, enabling you to submit HIPAA-compliant 837 electronic claims directly to payers
- Enables you to generate custom reports easily, without IT assistance or reporting application knowledge

"Patient satisfaction, built on the efficiencies and excellence of NextGen® software, is part and parcel to our growth and development."

James L. Holly, MD
Southeast Texas Medical Associates

The NextGen Difference

It takes more than software to produce success in a complex environment. That's why NextGen Healthcare sees a business relationship as an ongoing partnership. We maintain our commitment to family practice and primary care with specialized service, training, and experience.

NextGen Ambulatory EHR and NextGen Practice Management software are fully integrated to share a single database platform, providing improved control and knowledge over clinical and billing operations. Find out more about how our scalable, flexible, and reliable enterprise system can help you better coordinate care, streamline workflow, improve efficiencies, and enhance quality of care, while increasing overall revenue.
