

NextGen for

Orthopedics

You Are Here.

Keeping up with labor-intensive paper charts often requires costly staff overtime. Answering patient inquiries, posting cases, and refilling prescriptions can extend your work day. Creating progress notes, referral letters, and patient treatment plans consumes precious time as information must be re-generated for each deliverable. Not only is transcription expensive, but referring physicians call regularly for delayed letters.

You Could Be Here.

Destination — Future-Focused Orthopedic Practice

Documenting patient care electronically, while running a single integrated system for electronic health records and practice management. Entering data once for use in multiple documents. Gaining instant access to information and improving office efficiencies to reduce overtime, improve patient care, and cut overall costs. Greatly reducing dictation/transcription costs and delays. Coding at the highest level possible. Finishing your day with all refills completed, cases posted, and patient inquiries addressed—and doing so within minutes of your last patient leaving the office.

So How Do You Get There?

NextGen — Empowering Orthopedic Practices with Fully Integrated Technology

NextGen Healthcare provides powerful electronic health record (EHR) and practice management software designed to accommodate the unique needs of orthopedic practices. NextGen® Ambulatory EHR and NextGen® Practice Management can be implemented as an integrated solution or separately as stand-alone applications. Either way, you will benefit from our extensive knowledge of your specialty. The NextGen® system is designed to meet your unique clinical and administrative needs. We also offer training and support services to ensure a successful implementation.

NextGen Benefits for Orthopedic Practices

- Simplified patient visits and better patient care through orthopedic-specific knowledge-based templates and evaluation and management (E&M) coding
- Increased competitive advantage and enhanced overall revenue through automated data collection and user-friendly reporting tools
- Ongoing support from an award-winning team of industry experts, including a Director of Orthopedics, dedicated to serving the needs and interests of orthopedics
- Facilitate calculations with integrated tools—utilize NextGen software’s tools for determining Harris Hip Score, Knee Score, and Oswestry Index—as well as the AO Uniform Fracture Classification
- Achieve unparalleled flexibility for customization—tailor your system according to your individual workflows to accommodate the needs of multiple providers and gain greater acceptance. Plus, benefit from NextGen Healthcare’s ongoing product enhancements and upgrades, even when using customized templates
- Better manage patient volume—profit from NextGen® software’s exclusive WorkLog Manager, which enables administrators to assign tasks to personnel or the software for auto completion. As a result, you can streamline patient visit/surgery scheduling while maintaining your patient volume

Simplified Patient Visits, Better Patient Care

- Access comprehensive clinical content—document a complete office visit, including pre- and post-op appointments, with user-friendly, orthopedic-specific templates
- Expedite office visits—tap into NextGen® software’s office visit templates for fast one-click navigation to HPIs, histories, ROS, exams, procedures, assessment, diagnostic studies, and plan/orders
- Quickly capture musculoskeletal and physical exam data—utilize exam templates, featuring on-the-fly defaults, to capture routine detailed patient information with a single tap
- Easily document a wide range of procedures—employ templates for simple documentation of procedures such as joint aspiration/injection; fracture, casting, and strapping; and wound care/suture removal
- Take advantage of interactive graphics—quickly select a body location in documenting range of motion and procedure details

The range of motion template for the shoulder enables fast documentation of specific degrees for a thorough ROM examination

Increased Competitive Advantage, Enhanced Overall Revenue

- **Drive down the cost of operations**—reduce costs by automatically generating critical documentation. Enter data once to create patient encounter summaries, referral letters, patient treatment plans, and prescription orders. Send any necessary information to referring physicians electronically—right from the exam room
- **Gain faster time-to-revenue**—tap into E&M coding audits for exams to generate suggested level of service and supporting HCPCS codes. Gain musculoskeletal system-specific E&M coding
- **Expedite extensive interfacing**—communicate seamlessly with PACS systems, radiology clinics, labs, and hospitals for optimized utilization of resources
- **Streamline orders and workflow**—use NextGen® software's workflow to guide you through each step of care. Streamline the review of diagnostic, test, lab, and study results—and automate orders. Quickly and easily share information
- **Achieve easy case management for patients with multiple injuries**—automate billing for easy management of patients treated for multiple incidents. Easily respond to requests for charts, quickly sending only the appropriate information to attorneys, case managers, et al, in real time
- **Manage all scanned documents and images**—oversee charts, x-rays, labs, photographs, and referral letters electronically, thus enabling efficiencies that save money and enhance patient care

Ongoing Support from a Team of Industry Experts

Benefit from our proven implementation strategy and focused training philosophy while tapping into the expertise of knowledgeable NextGen Healthcare orthopedic trainers. We guide your implementation using an orthopedic-specific project plan, training scenarios, and tools. Once our system is installed, a wide variety of training and support services are available to help you maximize your technology investment.

“Using NextGen® software, we electronically file claims for faster payment turnaround and decreased A/R days.”

Dr. Leonard Kibiloski
OSMC Indiana

The NextGen Difference

It takes more than software to produce success in a complex environment. That's why NextGen Healthcare sees a business relationship as an ongoing partnership. We maintain our commitment to orthopedic practices with specialized service, training, and experience.

NextGen Ambulatory EHR and NextGen Practice Management software are fully integrated to share a single database platform, providing improved control and knowledge over clinical and billing operations. Find out more about how our scalable, flexible, and reliable enterprise system can help you better coordinate care, streamline workflow, improve efficiencies, and enhance quality of care, while increasing overall revenue.
