

FOR IMMEDIATE RELEASE

NEXTGEN HEALTHCARE LAUNCHES CERTIFIED HIT CONSULTANT PROGRAM

Program to partner with healthcare IT consultant community to help providers achieve meaningful use of electronic health records

Horsham, Pa. – January 25, 2010 – In anticipation of significant growth in healthcare IT adoption, [NextGen Healthcare Information Systems, Inc.](#), a wholly-owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and the leading provider of healthcare information systems and connectivity solutions, today launched the [NextGen Certified HIT Consultant Program](#).

“Following the recently proposed criteria for demonstrating meaningful use of electronic health records, NextGen Healthcare envisions considerably greater demand in 2010 for certified EHR systems implementation specialists to guide medical providers through the qualification process for government incentives,” said [Scott Decker](#), president of NextGen Healthcare. “With this consultant certification program, we expand our commitment to support the medical provider in improving overall health outcomes by helping them become meaningful users of electronic health records systems.”

This new program also expands NextGen Healthcare’s commitment to Regional Extension Centers, which will commence in early 2010 with the announcements of the first group of award grantees. The company will now provide exclusive NextGen solution certification training to the healthcare IT consulting community and to Regional Extension Centers on [NextGen® EHR](#), [NextGen EPM](#), and ancillary modules. All classes will be conducted at NextGen Healthcare’s corporate training facilities located throughout the country.

In April 2009, NextGen Healthcare announced its [Money-Back Guarantee Program](#) around meaningful use to assure the NextGen EHR solution will always evolve to meet the requirements for federal stimulus reimbursement programs. With the addition of this HIT consultant certification program, NextGen Healthcare is demonstrating to the medical provider community its confidence in providing the best software and services available to help them become meaningful users.

For more information about the program, its associated fees and how to apply, please contact consultants@nextgen.com.

This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company's future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; uncertainties concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods' financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems' periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company's quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company's revenues and operating results are very difficult to forecast. A major portion of the Company's costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company's period-to-period financial performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
