

The Next Level of Healthcare Technology

Increased monthly charges by \$1.3 million

\$3.5M cash surge from A/R reduction

\$350K in transcription savings

Increase in physician productivity (1-1½ hr/daily)

We measure ourselves by your success.

This is truly NextGen Healthcare's goal. Nothing shows off our products like our successful clients – improving care, winning awards, saving money, increasing revenue and growing their business – using quality products that give them the freedom to practice care to the best of their ability and be prepared for the future of healthcare.

Who We Are

With more than 1,200 employees, 2,500 clients, 45,000 users and growing by leaps and bounds, NextGen Healthcare is a full-service organization serving the needs of physician practices, hospitals, health centers and other healthcare providers. Together, we are committed to transforming healthcare through the innovative use of award-winning, easy-to-use software products, business services and strategic consulting.

The NextGen Portfolio

Ambulatory

NextGen® EHR – Providing the best path for Meaningful Use, our industry-leading, award-winning EHR stands apart from all others. NextGen Healthcare's EHR version 5.6 is a CCHIT Certified® 2011 Ambulatory EHR, additionally certified for Child Health and Cardiovascular Medicine with Advanced Reporting.* Our solution features:

- Pre-built clinical templates and workflow for over 26 specialties
- Disease management templates
- A health quality measures module
- Discrete data captured at the point of care for pay-for-performance programs
- ePrescribing with drug and allergy alerts
- A subscription model option
- The support of a Money-Back Guarantee, and much, much more

NextGen® Practice Management – Automate your practice and centralize registration, appointment scheduling, billing, collections and other business processes with an enterprise system fully unified with NextGen EHR.

Inpatient

NextGen Clinicals - A powerful suite of clinical applications, NextGen Healthcare's NextGen Clinicals version 2.3 is a CCHIT Certified® 2008 Inpatient EHR*, residing on an advanced, truly active web 2.0 platform.

NextGen Financials - NextGen Financials is a financial and administrative system that helps hospitals significantly improve their smart operations and financial and regulatory management of their facilities.

Business Services

Revenue Cycle Management - NextGenSM Practice Solutions provide unparalleled, technology-driven, revenue-improvement services that create efficient and effective business operations – meaning you can focus on patients, and get paid faster, too.

NextGen Electronic Data Interchange (NextGen EDI) - A wide range of administrative processes (from printing and stuffing patient statements to data entry) are provided by moving data electronically from your NextGen Practice Management system to our EDI team.

Software-as-a-Service (SaaS)

Practices can quickly and easily benefit from the industry's leading electronic health records and enterprise practice management software without the typical upfront costs with NextGen's SaaS subscription model, an alternative to purchasing the system.

For a fixed cost, this solution packages everything a practice needs to go to the next level of healthcare technology, including: state-of-the-art hosting, implementation, training, maintenance, image scanning and superior client support.

See <http://www.nextgen.com/SaaS/> for more information.

The NextGen Portfolio (Con't)

Community Connectivity

NextGen Health Information Exchange - A highly secure data exchange and repository that stores, displays and exchanges complete patient records, NextGen Health Information Exchange allows a community with participating practices using EHRs outside the NextGen Healthcare enterprise to easily exchange community data.

NextGen Patient Portal - Our advanced patient-provider portal promotes an interactive continuum of care between the patient and the practice, facilitating effective electronic communication and clinical data exchange.

NextGen Health Quality Measures Reporting Module - A clinical data repository used for automatic registry reporting of clinical outcomes and quality measure data required by pay-for-performance (P4P) programs and Meaningful Use.
