

>>> Spotlight On: *The NextGen Physician Resources Team*

Client Services

Through consultations with our physician team, you can benefit from years of real-world experience in adopting and utilizing healthcare information technology. During your NextGen® software implementation, these qualified physicians from various specialties can help evaluate workflow and make recommendations on the optimal use of electronic health records. This includes a kick-off presentation that covers:

- What to expect during your NextGen software implementation
- How to prepare for a smooth transition and gain buy-in from staff
- How to develop plans that help achieve quality improvement
- How to prepare for quality reporting, Meaningful Use, and a Patient Centered Medical Home

The physicians' expertise is also applied to content for best practice white papers, eLearning classes, and Web-based training for clients. Physician-led training courses are available in the [Training Portal](#).

Thought Leadership

Our physicians work hand-in-hand with the NextGen Healthcare product development team to enhance content using evidence-based guidelines and standards. They drive industry change through participation on national committees dealing with quality improvement standards, pay-for-performance, ePrescribing, and more.

The NextGen Healthcare physician resources team is just one way we strive to improve patient care, reduce healthcare costs, and achieve the Gold Standard of client satisfaction.

Physician consultants are billable at NextGen Healthcare's standard rate. For more information on physician services, contact us at sales@nextgen.com. Current clients, please contact your implementation project manager or [open a support ticket](#).

Meet The Physicians

Sarah Corley, MD is the Chief Medical Officer for NextGen Healthcare. She also practices part time as a primary care Internist in the metropolitan Washington, DC area. She served as Governor of the Virginia chapter of the American College of Physicians (ACP) and was on its National Medical Informatics Subcommittee. She currently serves as a Commissioner for the Certification Commission for Healthcare Information Technology and represents the ACP on the Physicians' Electronic Health Record Coalition. She received post-graduate training in Medical Informatics at OHSU and has used electronic health records for the past 15 years.

See other side for biographies of Dr. Corley's team of physicians.

Cephus Daniel Vincent Allin, MD is an Internist who, prior to medical school, worked on an advanced degree in computer chemistry. He has used EHR in a clinical setting since 1996. While working in federal healthcare, he received awards for establishing the first "paperless" practice and for provider education on EHR best practices.

John Ellis, DO is Board Certified in Family Medicine and serves as the Medical Director of North Valley Family Medicine in Glendale, Arizona. He has served as an Adjunct Assistant Professor at the Arizona College of Osteopathic Medicine and has an extensive background in both clinical and laboratory-based research. He has used EHRs in clinical practice since 2003.

Tom Galland, DO is Board Certified in OBGYN and has over 20 years of clinical experience. Prior to obtaining his medical degree, he earned a BS in pharmacy and MS degree in pharmacology and worked in the US Army as a Toxicologist. He has practiced medicine in the Washington, DC area in the private sector as well as with Kaiser Permanente, a large HMO. In addition to his clinical background, he has software programming experience and wrote an OB specific application which he sold to an EMR company in 2000. For the past 10 years he has devoted full-time working with development and implementation of EMR systems. In 2009 he volunteered his time to serve as a workgroup committee member for CCHIT, the Certification Commission for Healthcare Information Technology.

Menen Mathias, MD has General Surgical training and Cardiothoracic Surgery research that has been published. With over 4 years of experience in the implementation and development of EHR software, Dr. Mathias has been certified in Crystal Report writing. She has written numerous EHR training manuals and test plans, and participated in clinical software upgrades during her tenure at a major teaching facility in New York.

Roy Gill, MD is Board Certified in Family Medicine, which he practiced for over 18 years. He has used EHRs in clinical practice since 1996. He served as Senior Medical Informatician with Geisinger Health System, where he was directly involved with implementing and optimizing an EHR in various healthcare settings, as well as directly programming multiple specialty applications. He received post-graduate training in Biomedical Informatics from OHSU.

Barbara Lanzara, MD is a Board Certified obstetrician-gynecologist and has practiced in a hospital and outpatient clinic setting for more than 20 years and was a member of the Executive Board of the Doctors Union at her hospital. For the past 8 years, she was an EHR physician champion involved in designing, testing, QA, and training staff.

Jessica Kasirsky, DO is a Board Certified Emergency Medicine Physician. She has practiced in New York since 1997, and received her training at St. Barnabas Hospital in the South Bronx. Currently practicing in a community hospital in Westchester County, NY, she has helped implement EHR in her department and train fellow physicians.

Deborah Freeman, MD is a Board Certified OB/GYN physician with 28 years of clinical practice experience. Over the years, she has practiced in a variety of clinical settings including private practice, college health and the county health system. Dr. Freeman served as the Medical Director at several of MetroHealth Medical Center's satellite clinics. She also served as the Associate Medical Director for the OB/GYN department at the Center for Community Health at MetroHealth Medical Center. Dr. Freeman has a Master's degree in Public Health and has used EHR in clinical practice for the past 10 years.
