

Powering Better Outcomes for Community Health Centers

More than 300 community health centers choose NextGen Healthcare to power their care delivery.

Deliver true, whole-person care with a fully integrated platform that connects primary care, behavioral health, dental, social services, and specialty care under one roof. Our clients benefit from improved clinical outcomes, reduced administrative burden, stronger financial performance, cleaner reporting, and expanded access through digital engagement that's **purpose-built for community health centers**.

Built for enterprise architectures, effortless integration, and seamless transitions from one specialty to another, our solutions are uniquely adapted to meet the needs of community health organizations.

Enterprise Design & Configuration – An integrated system for all aspects of community health care, including more than 26 different specialties. Providers only need to learn one system regardless of specialty.

Rules-Based Billing Automation – Accelerate the speed and accuracy of turning charges into revenue with enterprise-ready practice management solutions.

Hands-free, AI-assisted documentation – Generate SOAP notes in 20–30 seconds and save providers up to 2.5 hours a day documenting.

Effortless Interoperability – Consolidate data from disparate sources for a single source of truth across your patient population.

Our Strengths, Your Benefits

- Architected out of the box for scale and dynamic growth
- Fully integrated EHR to support whole-person care
- Proven results for health centers exploring value-based care
- Market-leading interoperability
- Integrated patient experience platform and secure patient access
- Managed services (SaaS / Cloud)

7 Levers of Efficiency

Efficiency is key to driving better outcomes for patients and providers alike. From first contact to lifelong care, we strengthen every stage of the healthcare journey—beginning with access and intake, to the patient visit, care coordination, and ongoing health management.

With AI and intelligent automation, you can streamline workflows, optimize administrative tasks, accelerate revenue, and thrive. Applying the right technology to 7 key areas—or “efficiency levers”—can enable your health center to:

- **Drive 10% more margin** without adding a new patient
- **Boost contract value** and ensure referrals convert to revenue
- **Increase administrative capacity** by 15%, without hiring
- **Attract and retain** more patients and **decrease no-shows**
- **Type less, treat more**—with measurable return
- **Reduce 5–10% of non-clinical costs** with data-backed decisions

NextGen Population Health & Value-Based Care enables care managers to target the highest priority patients for care team interventions, notify patients of care gaps, and improve population health management. Population health analytics help health centers generate revenue from reductions in total cost of care. Boost quality metrics, gain insights on patient populations, track transitional care management, and improve care coordination.
