

Restore Provider Joy with Less Work and *More Revenue*

NextGen® Ambient Assist

More time, more joy—better care!

Discover the value of NextGen Ambient Assist and the heavy lifting it can do for providers. Automating clinical documentation reduces cognitive load, saves time, and eliminates the need for scribes.

Save up to 2 hours per day, per provider!

Macros **seamlessly launch physician documentation** favorites with simple words or phrases.

More time from less documentation enables providers to see more patients and **increase practice revenue.**

AI technology provides relevant suggestions for ICD-10s, medications, and lab/imaging orders.

Clinical Documentation Tasks Required Per Visit

Documentation without AI technology

1. History of Present Illness
2. Physical Exam
3. Assessment and Plan
4. Procedures
5. Follow-up Recommendations
6. Orders – Radiology, Labs
7. Prescriptions
8. ICD-10
9. Charge Capture
