NextGen® Ambient Assist

Give Your Providers an Experience Advantage

Meet your new AI ally

NextGen Ambient Assist for NextGen Mobile utilizes ambient listening technology to securely convert natural patient-provider conversations into structured SOAP notes

Following provider review, these notes are then automatically integrated into the patient's chart in NextGen® Enterprise EHR..

Level up from ordinary documentation

With Ambient Assist at their side, providers can shift their focus from tedious documentation to quickly verifying generated notes. This leads to more time for providing excellent care.

SOAP notes are generated dynamically and can be reviewed before the patient even reaches the front door versus other solutions that require additional steps that consume hours after the patient visit.

Features

- Works with natural, conversational speaking styles
- Generates a SOAP note with 90% accuracy, prior to review, in 20-30 seconds
- Seamlessly integrates the note into the EHR with no copy and paste required
- Provides relevant suggestions for diagnosis codes and lab/imaging orders
- Fully supports Spanish language patient-provider conversations

Benefits

- **Saves providers up to 2 hours of documentation time per day**
- Eases burnout and reduces the headaches from documentation workloads
- **Frees providers to focus on their patient relationships**
- Audio and transcripts are never stored or saved to ensure privacy and security
