

# NextGen Remote Scribe Services

Break free from the EHR and take full advantage of mobile dictation

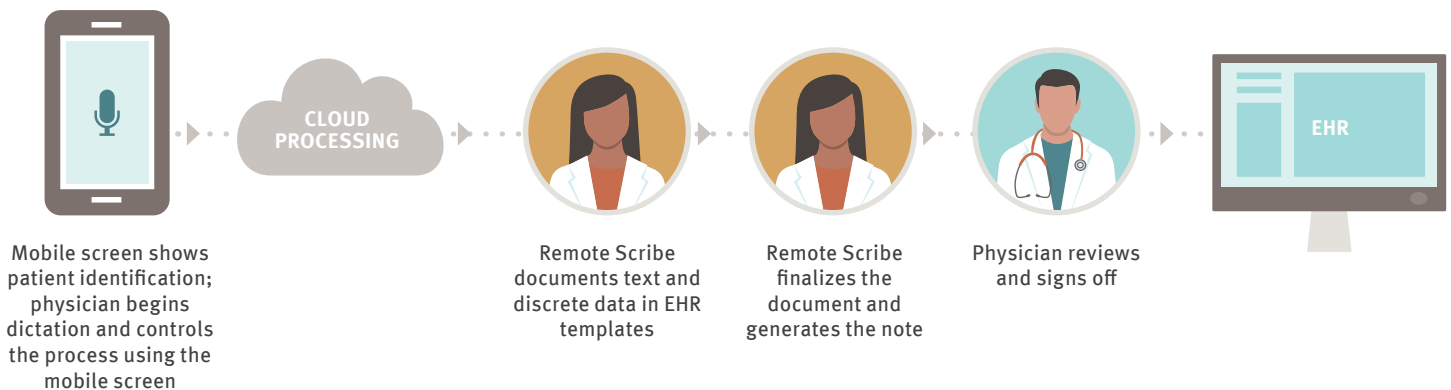

**Average time spent in the EHR each day by US providers<sup>1</sup>**

At NextGen Healthcare, we think that's *way too much*.

## What if providers could document on the go, away from the EHR?

Flexible and cost-effective, NextGen<sup>®</sup> Remote Scribe Services helps keep each clinical encounter focused on the patient, not a computer screen. Increase productivity while reducing stress.

## How NextGen Remote Scribe Services works

## Reduce data entry and finish your workday on time

With NextGen Remote Scribe Services, a physician begins by dictating an encounter into their smartphone using the NextGen<sup>®</sup> Mobile app. The recording is then passed along to the remote scribe who finishes the work in the EHR from another location. Less time spent entering data means that providers can complete all their documentation before the next encounter. Using NextGen Remote Scribe Services also improves documentation accuracy.

### Personalized scribe services

Using a fully HIPAA-compliant process, a professional scribe in a remote location listens to the recording of the mobile dictation and documents the patient encounter as instructed by the physician. The scribe enters discrete data and unstructured text notes directly into the EHR via remote access.

## Benefits

- A professional remote scribe who completes all the required documentation within 12 hours
- HIPAA-compliant
- Frees providers from the EHR
- Much less burdensome than traditional documentation
- Greater flexibility – document on the go
- Time savings for providers and staff
- More time to concentrate on patient care
- Finish the workday on time

“A lot of the burnout rate is because of electronic medical records and the need to be glued to your computer. You’re typing the same stuff over and over again. I think NextGen Remote Scribe is absolutely the only solution at this point.”

**Darryn Band, MD**

Physician and Partner  
Capital Women’s Care  
Silver Spring, Maryland

In terms of fulfilling documentation requirements, a healthcare provider can be done with their work in minutes and pass it along to the remote scribe. Once physicians, clinical providers, and staff **experience how much faster, easier, and more accurate it makes clinical documentation, NextGen Remote Scribe Services is likely to become an essential, integrated extension of your EHR.**

Find out about more time-saving transcription options available from NextGen Healthcare. If your medical practice already uses NextGen® solutions, reach out to your account manager. You can also contact NextGen Healthcare at 855-510-6398 or [results@nextgen.com](mailto:results@nextgen.com).
