

Elevate Your Orthopedic Practice with One Intelligent Platform

An award-winning, AI-powered EHR and practice management platform packed with tools for musculoskeletal care can help you achieve the outcomes you want.

CLINICAL CARE SOLUTIONS

Improve the quality and efficiency of care delivery

Enable access to complete and accurate information so patients receive better care. When used for more than just AI-powered documentation, integrated clinical care solutions can save time and help diagnose diseases and reduce—even prevent—errors, improving patient and financial outcomes.

- Document with mobile, when and where you want, and save time
- Streamline clinical workflows with specialty-specific and configurable content
- Schedule surgery
- Easily stay current with regulatory, documentation, and compliance requirements
- Provide better care through integrated, mobile collaboration

FINANCIAL INTEGRITY SOLUTIONS

Drive healthy, predictable financial outcomes

More than just billing and collections, financial management involves all functions that effectively capture revenue at the lowest cost—remembering that the further an error travels through the cycle, the more costly recovery becomes.

- Provide a more informative and engaging check-in and billing experience
- Automate charge creation and create custom coding rules
- Maximize financial performance with clean claims and A/R management
- Recover everything you've earned with configured, turnkey contract audit and recovery

Our strengths, your benefits

- **AI-powered documentation**—Generate SOAP notes in seconds and save providers up to 2.5 hours per day.
- **Automated billing workflows**—Improve charge capture, accelerate reimbursement, and reduce manual effort.
- **Enterprise-grade interoperability**—Consolidate data from disparate systems into a single source of truth.
- **Integrated patient engagement**—Self-scheduling, reminders, digital intake, and multilingual outreach.
- **Agentic intelligence**—Proactive AI agents that manage tasks across clinical, operational, and financial workflows.
- **Configurable specialty workflows**—Tailor templates and protocols without sacrificing governance or upgrades.
- **Cloud-based scalability**—Secure, managed infrastructure that supports growth without replatforming.

CONNECTIVITY SOLUTIONS

Participate in frictionless interoperability

Orthopedists need vital patient data to help provide care with minimal delay. This can be achieved with secure, scalable, cost-effective, and configurable interoperability solutions.

- Access and share patient information seamlessly through a national data exchange
- Remain independent and provide optimal care with cost-efficient interoperability
- Access clinical data with easy-to-activate plug-and-play APIs for easy data exchange
- Consolidate data from disparate systems for a single source of truth across the community

PATIENT EXPERIENCE SOLUTIONS

Engage patients in their care and drive loyalty

High patient engagement supports better health outcomes. The good news is, patients want to be engaged in their healthcare and technology makes it practical.

- Improve patient engagement and decrease staff time spent on tedious tasks
- Deliver more care more conveniently with virtual visits
- Easily send personalized communication to patients using automated technology

Real world impact from practices like yours*

67%

reduction in patient no-shows

80%

of new patients schedule online

78%

reduction in referral leakage

45%

reduction in front-desk workload

2.5

hours saved daily per clinician

28%

improvement in patient collections

Save time with clinical solutions designed for orthopedics

- Document patient care from intake through charge creation
- Gain efficiency in the documentation of orthopedic specific HPI's, Physical Exams, Assessment & Plan
- Manage Surgery Scheduling process with workflow designed for the orthopedic practice
- Complete an entire clinical viewing and reporting workflow in your EHR with image-enabled orthopedic integrated PACS
- Identify the specific nature of treatments with ortho-specific ordering that includes advanced radiology, casting and strapping, and therapy orders

“I started adding on 5 extra patients per day. Numbers-wise, it [NextGen® Clinical AI] pays for itself very quickly. Especially when you're comparing a service like this to a live person where you have to consider not only their salary, healthcare, and insurance—the costs really add up. Comparatively, it's well worth the investment.”

Keith D. Nord, MD, Orthopedic Surgeon
Sports Orthopedics & Spine
