

Transform Your Orthopedic Practice with One Integrated Solution

An award-winning, integrated EHR and practice management platform packed with tools for musculoskeletal care can help you achieve the outcomes you want.

CLINICAL CARE SOLUTIONS

Improve the quality and efficiency of care delivery

Enable access to complete and accurate information so patients receive better care. When used for more than just documentation, integrated clinical care solutions can save time and help diagnose diseases and reduce—even prevent—errors, improving patient and financial outcomes.

- Document with mobile, when and where you want, and save time
- Streamline clinical workflows with specialty-specific and configurable content
- Schedule surgery
- Easily stay current with regulatory, documentation, and compliance requirements
- Provide better care through integrated, mobile collaboration

FINANCIAL MANAGEMENT SOLUTIONS

Drive healthy, predictable financial outcomes

More than just billing and collections, financial management involves all functions that effectively capture revenue at the lowest cost—remembering that the further an error travels through the cycle, the more costly recovery becomes.

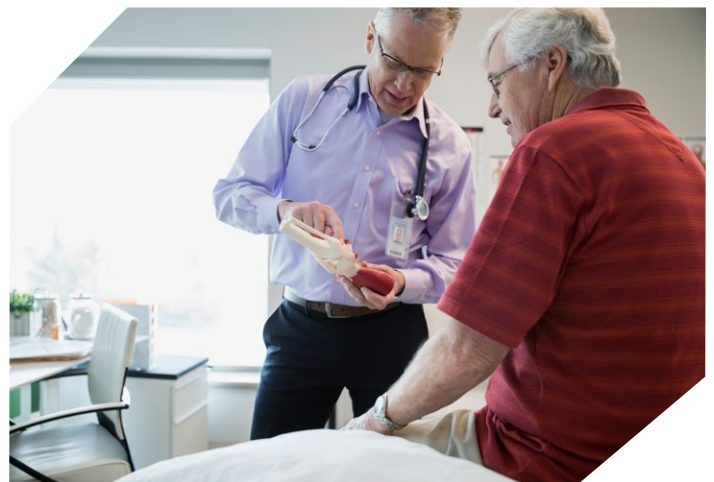

- Provide a more informative and engaging check-in and billing experience
- Automate charge creation and create custom coding rules
- Maximize financial performance with clean claims and A/R management
- Recover everything you've earned with configured, turnkey contract audit and recovery

NEXTGEN® MOBILE SOLUTIONS

Crush documentation burnout

Reduce documentation burdens and save time with mobile technology that seamlessly integrates with the EHR.

- **Digital documentation**—Document care accurately in the EHR and practice management system despite no connectivity
- **Mobile**—Turn smartphones into extensions of your practice and free orthopedists from hours spent on the EHR
- **Speech-to-text**—Decrease stress and increase productivity with dictation through mobile and voice-to-text technology
- **Transcription services**—Reduce charting time and increase productivity while reducing stress for your orthopedists
- **Virtual scribe**—Give your doctors the support of a professional scribe with more convenience and often at less cost
- **Remote scribe**—Reduce documentation burden to virtually zero with the help of a remote scribe who documents care in the EHR
- **Direct-to-desktop**—Dictate clinical narratives directly into the EHR to reduce or even eliminate the need for after-hours charting

CONNECTED HEALTH SOLUTIONS

Participate in frictionless interoperability

Orthopedists need vital patient data to help provide care with minimal delay. This can be achieved with secure, scalable, cost-effective, and configurable interoperability solutions.

- Access and share patient information seamlessly through a national data exchange
- Remain independent and provide optimal care with cost-efficient interoperability
- Access clinical data with easy-to-activate plug-and-play APIs for easy data exchange
- Consolidate data from disparate systems for a single source of truth across the community

PATIENT ENGAGEMENT SOLUTIONS

Engage patients in their care and drive loyalty

High patient engagement supports better health outcomes. The good news is, patients want to be engaged in their healthcare and technology makes it practical.

- Improve patient engagement and decrease staff time spent on tedious tasks
- Deliver more care more conveniently with virtual visits
- Easily send personalized communication to patients using automated technology

Save time with clinical solutions designed for orthopedics

- Document patient care from intake through charge creation
- Gain efficiency in the documentation of orthopedic specific HPI's, Physical Exams, Assessment & Plan
- Manage Surgery Scheduling process with workflow designed for the orthopedic practice
- Complete an entire clinical viewing and reporting workflow in your EHR with image-enabled orthopedic integrated PACS
- Identify the specific nature of treatments with ortho-specific ordering that includes advanced radiology, casting and strapping, and therapy orders

“The providers at OrthoAlaska were very accustomed to a dictation workflow, so mobile was an easy answer. Not just for the dictation piece; it gave providers the ability to look through the chart, they could dictate letters on the fly.”

Daniel Inscore
