

One Unified Tribal Health Package to Honor Your Mission

One partner. One seamless solution to power your care, reporting, and mobility needs.

Our all-in-one Tribal Health Package offers affordable, integrated solutions tailored for tribal health organizations. With AI-powered templates, seamless data exchange, and advanced reporting tools, the unified platform streamlines workflows, enhances care delivery, and fosters financial sustainability—empowering your organization to focus on your people and your mission.

Built for Tribal Health. Designed for Impact.

Comprised of NextGen® Enterprise EHR, NextGen® Mobile, and NextGen® Population Health, this fully integrated system is built for all aspects of tribal health care, including more than 26 different specialties.

NextGen Enterprise EHR enables our tribal health partners to more efficiently initiate patient care and engagement activities directly from their EHR workflow. Similarly, integration with the NextGen Mobile platform offers AI-assisted, hands-free documentation and provides quick and easy access to Population Health and HCC coding insights. For desktop and mobile users, the integrated Point-of-Care Insights is an added bonus, given its ability to inform providers when care gaps need to be addressed.

Population Health & Reporting

All tribal reporting is built into our population health platform—no more separate tools or manual uploads. Modern, web-based reporting replaces legacy systems and puts the power of population health directly into your hands.

Meet all federal and tribal reporting requirements (NDW, IDA, Title V) in one centralized system.

Tribal Reporting Package Scope

- GPRA reporting (26 measures)
- NDW: User Population, Workload, and Encounter reports
- IDA: Diabetic Audit annual WebAudit
- Title V: Immunization tracking and quarterly submissions
- Scheduled submissions via Manage/Files
- Embedded BI tools for visibility and reporting insights

Plus

- Real-time care gap insights
- Outreach integration
- Ongoing enhancements through cloud-based delivery

Visibility and Action

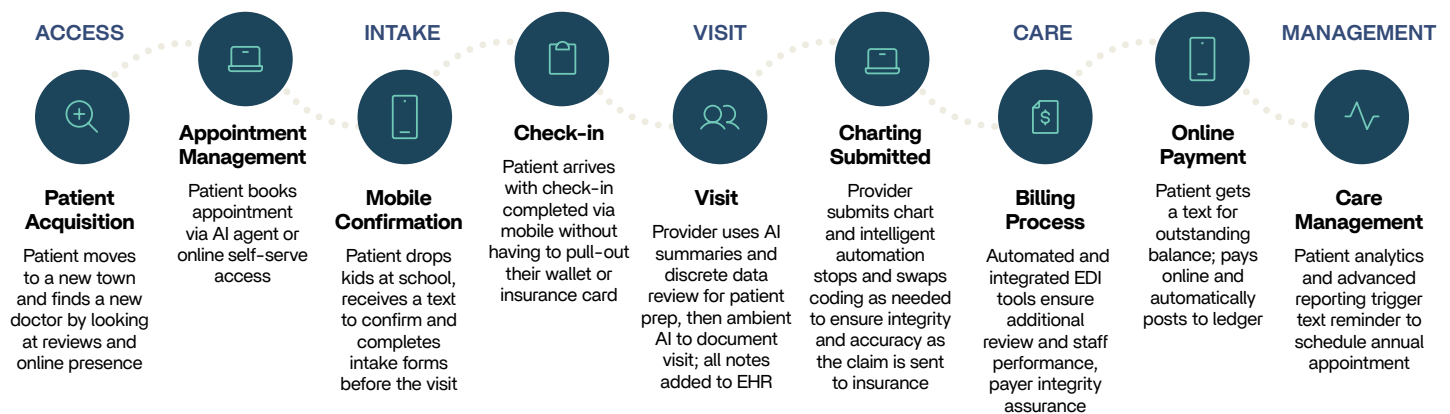

Proactive analytics, performance management, and real-time insights enable care teams to make smarter decisions. With patient outreach capabilities, care teams can quickly message a targeted cohort to call them to action—helping them close gaps in care, manage chronic diseases, engage high/rising risk patients, and inform their patient population.

The Population Health solution includes NextGen® Care, which enables you to quickly target specific population health cohorts to take action (e.g. ordering, tasking, alerting, etc.). Also, automated outreach efforts via the patient engagement outreach campaigns are possible in NextGen Care.

Optimize every step of the care journey

The NextGen® Closed Loop™ Patient & Practice Experience is an integrated, end-to-end solution that creates a seamless experience for patients, providers, and staff. Curated with the goal of enabling practices to establish better healthcare outcomes for all, this platform focuses on the entire care journey. The stages of this interconnected platform include access, intake, the visit, care coordination, and care management.

Mobile Access

The ability to access the EHR through your mobile device drastically reduces documentation time. Dictate notes or even use groundbreaking ambient listening technology to generate notes from patient-provider conversations.

Capture clinical data with ease and share it quickly and securely. Send clinical images from your cell phone securely to the EHR. View content synced from the EHR, such as patient data on your phone, and reduce the need to go to the office or log into your computer when on call.

Through this integration, providers can review, renew, and prescribe medications on the go with mobile e-prescribing and administer telehealth visits with NextGen Virtual Visits—all on their mobile device.

“As those [reporting] deadlines start to approach, we need to know where we’re at as far as the standings are concerned. With NextGen [Population Health], we’re able to stay up to date daily—we know where we sit and know what we have to improve on a daily, weekly, monthly basis.”
