

A Cloud-Based, AI-Orchestrated Platform for Your Urology Practice

Simplify complex workflows with one intelligent platform

Urology practices need more than a generic EHR. They need a platform designed for specialty complexity, operational scale, and evolving patient expectations.

NextGen Healthcare delivers a fully integrated, AI-orchestrated platform that puts urology practices confidently in control. Unifying intelligent EHR, practice management, revenue cycle management, patient engagement, and analytics solutions, we help you simplify complex workflows and drive better outcomes.

What this means for you: fewer workarounds, cleaner handoffs, and a single source of truth across the practice.

Where urology care flows seamlessly

NextGen® Urology Suite is purpose-built for the realities of urology care and architected to adapt as practices evolve. It supports the full scope of care, with:

- **Urology-specific templates** and documentation
- **Condition-based workflows** for routine and complex cases
- **Procedures, diagnostics, and lab tracking** (cystoscopy, BCG, hormone therapy, urine cultures, prostate care)
- **Longitudinal patient timelines** for care tracking
- **Streamlined scheduling** and resource utilization across providers and locations

The result: faster adoption, less customization overhead, and workflows that reflect how urology practices actually operate.

“NextGen [Healthcare] taught us how to customize templates—the documentation of our procedures, and we even built in a charging system to get us away from paper charges.”

Ashley Hicks, RN, Clinical Supervisor / Viewmont Urology Clinic

Our strengths, your benefits

These urology workflows are complemented by platform-level capabilities that power efficiency and growth:

- **AI-assisted documentation** – Generate SOAP notes in seconds and save providers up to 2.5 hours per day.
- **Automated billing workflows** – Improve charge capture, accelerate reimbursement, and reduce manual effort.
- **Enterprise-grade interoperability** – Consolidate data from disparate systems into a single source of truth.
- **Integrated patient engagement** – Self-scheduling, reminders, digital intake, and multilingual outreach.
- **Agentic intelligence** – Proactive AI agents that manage tasks across clinical, operational, and financial workflows.
- **Configurable specialty workflows** – Tailor templates and protocols without sacrificing governance or upgrades.
- **Cloud-based scalability** – Secure, managed infrastructure that supports growth without replatforming.

Real world impact from practices like yours*

67%

reduction in patient no-shows

Driving measurable ROI through the 7 Levers of Efficiency†

NextGen Urology Suite is engineered to unlock operational and financial performance across seven key areas:

- RCM Uplift**
10% increase in gross profit
- Physician Efficiency**
~2.5 hours of documentation saved per day
- Contracts & Referrals**
2-3% increase in contract value and 10-20% uplift in referral completion
- Cost Containment**
5-10% reduction in non-physician op-ex
- Staffing & Site Optimization**
10-15% increase in admin capacity
- New Revenue Expansion**
\$250K to \$1M annual lift
- Patient Acquisition & Retention**
10-15% uplift in patient revenue
