

POPULATION HEALTH ANALYTICS

Tools that drive your transition to value-based care

Solution description

NextGen® Population Health solutions can help you transition to value-based care delivery and payment models. We can help at any point on your journey—whether you're in the earliest stages of quality measure reporting, in a gainsharing arrangement—or taking on risk and fully accountable care coordination.

What this solution enables

Our tools empower you to deftly balance ongoing improvements in quality and outcomes while simultaneously managing resources:

- Provide a single source of truth by aggregating disparate data, including vendor-agnostic clinical data with paid claims data.
- Drive efficient care gap closure and gain a 360-degree view of your patients' risk assessment through vendor-agnostic integrated insights at the point of care—all within the EHR workflow.
- Identify the highest risk patients that have the potential to impact your quality and financial performance, and prioritize targeted outreach. Powered by the Johns Hopkins ACG System.
- Improve performance on quality measure incentives and identify immediate fee-for-service revenue opportunities by closing gaps in recommended preventive services.
- Facilitate outreach to close gaps in care with proactive tools including a pre-visit planning dashboard. An integrated care transitions feature in the dashboard also facilitates assigning care management resources during care transitions.
- Target the highest-risk patients in your population and accurately assign appropriate care team resource interventions to the right patients at the right time.

What does this mean for your practice?

NextGen® Population Health Solutions tailored to your journey:

Core is the central clinical population health management module that provides disease registry information, population demographics, and analysis of gaps in care based on your organization's required clinical quality measures. Data is derived from multiple sources including clinical EHR, paid claims, HIE, ADT, and patient-generated health data.

Care Coordination provides care managers with comprehensive pre-visit planning tools, patient-predictive risk stratification, and automated tracking of admission, discharge, and transfer events.

Value Management provides healthcare leadership a 360-degree view of the physicians they employ, while illuminating the relationship between cost and quality. The module provides a detailed look at the clinical and financial performance of physicians and the network as a whole.

“We've been using NextGen® population health for a few months and seen an impact on patient care and patient engagement. The system has already paid for itself.”

Dr. Nicholas Cote, Director, Ambulatory
Information Systems
Hunterdon Medical Center

NextGen Prioritization Matrix

Use this matrix to help you prioritize solutions that support your practice success.

	Capability	Cost	Revenue	Quality	Effort	Impact	Priority
Clinical Care	Adaptive Workflows & Specialty Content	★★★	★★★★★	★★★	High	★★★★★	
	Mobile Dictation & Virtual Scribe	★★	★★★★★	★★★	Low	★★★★★	
	Compliance	★★	★★★	★★★★★	Medium	★★	
	Care Team Collaboration	★★★	★★★	★★★★★	Low	★★	
Financial Management	Eligibility & Pre-Service Financial Clearance	★★	★★★★★	★★★	Medium	★★★★★
