Permission is hereby granted in perpetuity, without payment of license fees or royalties, to use, copy, or distribute the Licensed Materials for any commercial or non-commercial purpose, subject to the following terms and conditions:

1. To prevent the dilution of LOINC's purpose to provide a definitive standard for identifying clinical information in electronic reports, neither the Licensed Materials, nor any portion thereof, may be used for the purpose of developing or promulgating a different standard for identifying patient observations, such as, but not limited to, laboratory test results; other diagnostic service test results; clinical observations and measurements; reports produced by clinicians and diagnostic services about patients; panels, forms, and collections that define aggregations of these observations; and orders for these entities in electronic reports and messages.

2. The name of, or any contents of, any fields in the Group 1 Artifacts shall not be changed. The contents of any fields in the Group 3 Artifacts shall not be changed. New fields may be added to the Group 1 Artifacts and Group 3 Artifacts to attach additional information to existing LOINC records.

3. Records may be deleted from the LOINC Table or LOINC Table Core to deal with local requirements. Records also may be added to the LOINC Table and LOINC Table Core to deal with local requirements, provided that if new records are added, any new entry in the LOINC_NUM field of such new records must contain a leading alphabetic "X" so that the new codes and records cannot be confused with existing LOINC codes or new LOINC codes as they are defined in later releases, and further provided that reasonable

efforts are made to submit requests to LOINC for new records to cover observations that are not found in the LOINC Table (and LOINC Table Core) in order to minimize the need for X-codes. Records deleted or added to deal with local requirements are not reflected in the official LOINC Table and LOINC Table Core maintained by the Regenstrief Institute, Inc.

4. The Group 1 Documents, Group 2 Documents, and Group 3 Documents may not be modified, nor may derivative works be created, without the prior written permission of the Regenstrief Institute, Inc. To request written permission, please contact loinc@loinc.org.

5. The LOINC parts and LOINC part hierarchies shall not be used in any manner except as they are presented in the Licensed Materials (and/or in other formats of distribution approved by Regenstrief Institute, Inc.) to organize, categorize, and be constituents of LOINC terms, and provide links to external terminologies. The LOINC parts and LOINC part hierarchies are subject to change, addition, modification, or deletion, without notice, and are not strictly managed under the same policies as LOINC terms.

6. The RELMA program is provided with the full RELMA database and associated search index files, as well as the LOINC Table and other database tables comprising the RELMA database. In addition to its use with the RELMA program, the LOINC Table that is obtained with the RELMA program may be used independently and the LOINC Table also may be modified as permitted herein. The other database tables from the RELMA database or the associated search index files may not be used or modified except in conjunction with the authorized use of the RELMA program, unless prior written permission is granted by the Regenstrief Institute, Inc. To request written permission, please contact loinc@loinc.org. The RELMA program also provides access to certain internet-based content copyrighted by Regenstrief Institute, Inc. by Section 10 hereof). A small portion of the content of the Licensed Material consists of content subject to copyright from third parties. This third-party content is either used with permission or under the applicable terms of use. In all such cases, we have included the copyright notice. The copyright of the LOINC codes per se remains owned by Regenstrief Institute, Inc. and the LOINC Committee and subject to the LOINC Copyright Notice and License.

Some included third-party content requires attribution specific to a particular LOINC code or codes. In RELMA and our web-based search application (http://search.loinc.org), the third-party content is highlighted as follows: When such content appears in a search result grid, the programs will display a field with a link to a page containing the copyright notice and terms of use for that content. The programs may also visually highlight the rows of these LOINC codes.

When LOINC terms with third-party copyright are included in any products or services as described in Section 10 above, the copyright notice contained in the EXTERNAL_COPYRIGHT_NOTICE field must be included in addition to the LOINC copyright notice. Any use or administration of third-party content is in accordance with the third-party content owner's license and/or terms of use; third-party content is included in LOINC to allow standardization of clinical data associated with the third-party copyright content. Inclusion in LOINC does not imply permission to use or administer third-party content without following the third-party content owner's license and/or terms of use.
