MIRTH CONNECT

Cost-Effective Interoperability

Build an unlimited number of flexible and seamless interfaces across healthcare systems

Scalable interoperability that streamlines the exchange of health information enables more efficient operations and promotes better outcomes across communities.

Secure, flexible, vendor-agnostic data exchange

Mirth® Connect by NextGen Healthcare allows you to optimize your interoperability needs regardless of the system, message type, and transfer protocol—all with a low cost of ownership. This proven integration engine has a template-driven architecture, providing you quick, easy, and flexible channel development. Mirth Connect is also a Java-based application enabling you to use your server preference for deployment. We provide the flexibility and resources your organization needs to elevate your performance, with the option of expert-level support, extensions, and tiered pricing.

Connect to any system over any protocol

- FHIR
- HTTPS
- Web Services (SOAP)
- REST API
- MLLP
- TCP/IP
- Database
- File System
- Email
- FTP / FTPS / SFTP
- JMS
- DICOM
- Serial
- ASTM E1381

Gain more flexibility with expert support

Mirth Connect helps you develop, launch, and maintain your interface engine with our expert support.

> "The channels and features within Mirth Connect allow you to build integrations quickly. If I'm asked on Monday to integrate a new system into the hospital network, it will be installed and ready for testing in a week."

Óscar González, Software Analyst
