

Empowering Physicians to Pioneer Care That Transforms Patient Lives

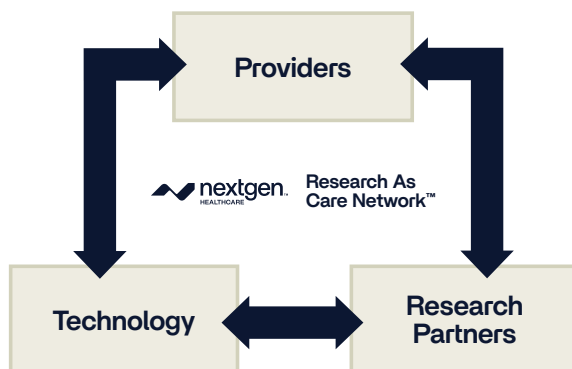

NextGen Research as Care Network™

The NextGen Research as Care Network brings together NextGen Healthcare's leading technology solutions, top provider clients, and top research partners to create a powerful vehicle to improve clinical outcomes—all at no cost.

By integrating clinical research and trial opportunities within the patient care workflow, this cost-free program ensures improved outcomes and advancements in commonly overlooked areas.

Research as Care

Healthcare providers face a myriad of challenges today: declining reimbursement, increased costs, and an onerous regulatory environment. Despite these challenges, the demand for better outcomes for patients has never been greater. At NextGen Healthcare, we believe clinical research leads to improved care and disease prevention while providing a tremendous opportunity for an additional and sustainable revenue stream for independent practices.

The NextGen Research as Care Network is purpose-built to unlock clinical research opportunities for providers across any and every specialty. As members of the NextGen Research as Care Network, our clients can participate in clinical research in essentially three ways:

- 1 **Provider Educator:** Educate your patients about the possibility of participation in clinical research studies.
- 2 **Study Site:** Provide a setting to conduct clinical research in adherence to pre-established protocols.
- 3 **Principal Investigator:** Directing and coordinating a research team, ensuring the research project objectives are met.

Whether the provider group has extensive experience with clinical research or is just embarking on research for the first time, the *NextGen Research as Care Network* has the resources to drive successful outcomes for patients and the practice.

Trial IQ turns everyday care into research-ready sites without a single fee

Within the Research as Care Network, Trial IQ acts as the enablement layer that brings clinical research into everyday care. Embedded within your EHR workflow, Trial IQ prepares sites for research, matches patients to trials, and activates new study opportunities. By creating a nationwide network of trial-ready providers, Trial IQ helps sponsors reduce timelines while expanding patient access.

Research Readiness Score

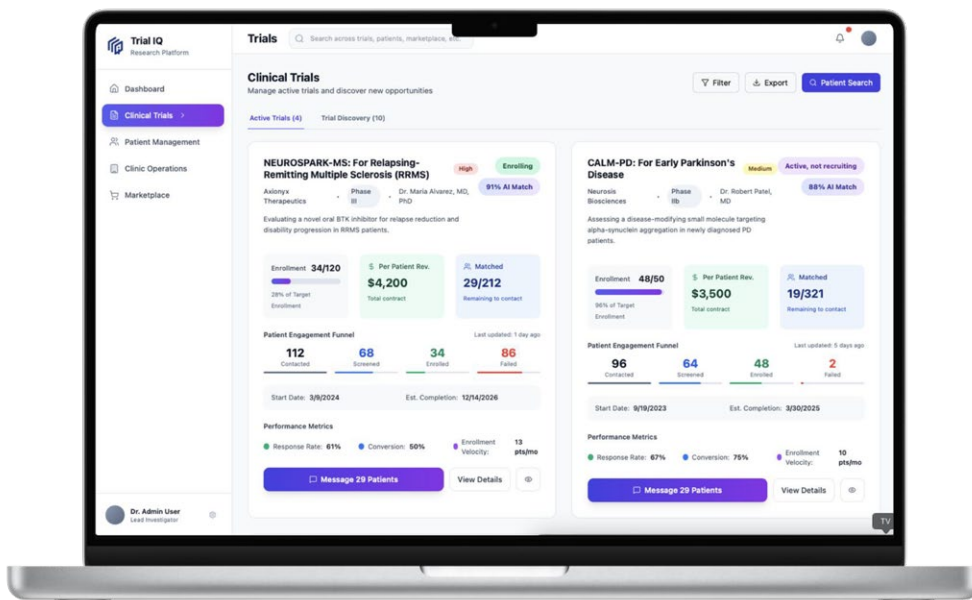

Comprehensive assessment of a practice's capabilities, personnel, and infrastructure.

AI-Based Matching Automation

Near real-time trial and patient identification at the point of care.

Connected Network

A unified research network that connects patients, physicians, sponsors and CROs.

The Enablement Layer for Clinical Trials

Trial Matching Dashboard

- Discover and evaluate open trials matched to patient populations
- Identify, pre-screen, and predict eligible patients using live EHR data
- One-click patient engagement and research interest

Clinical Operations

- Ensure site requirements for personnel, training, and infrastructure
- Manage site coordination, documentation, and CTMS connectivity
- Monitor enrollment performance and site health across every active protocol

50% faster site onboarding

30% increased compliance with training requirements

80% time savings in patient identification and recruitment
