

User-friendly Cardiology Solutions that Drive Better Patient Outcomes

Discover a simpler approach to health IT—designed for cardiology.

Make life easier for clinical staff and patients by bringing all your health IT together: EHR, practice management, revenue cycle management, cloud-hosting services, patient engagement, and health data insights.

Humanizing health IT, one practice at a time

Full-circle approach—implementation tailored to your unique needs

Personalized training—extensive training on time, and on budget

Live nationwide call support—average support response time of two hours, compared to the industry average of two days

Ongoing solution evaluation—solutions are continuously updated and new features are developed to meet your evolving needs

Awarded Top Customer Service Accolades by the Stevie® Awards for Seven Consecutive Years

BENEFITS

Content updated regularly

A team of cardiology providers and developers collaborate to keep content current.

Cardiology board of advisors

Design and functionality enhancements are suggested by cardiologists, for cardiologists.

Cardiology device connectivity

Get optional integration to PACS, stress tests, nuclear medicine, ECG/EKG, and more.

CARDIOLOGY-SPECIFIC FEATURES

EHR

An integrated cardiology EHR enables access to complete information, supports effective coordination of care, and saves time.

More than 400 cardiology-specific enhancements, including:

- Documentation and workflows for your specialists—general/non-invasive, invasive, interventional, EP, and vascular
- ScoreCard™ captures and trends cardiovascular risk factors such as HAS-BLED, NYHA, CHA2DS2-VASc, Framingham, MESA, WHO/PAH, pooled cohort, and weight over time
- Device connectivity to your PACS, pacemakers, stress tests, nuclear medicine, ECGs/EKGs, labs, and other data
- Automated AUC workflow—integrated and intuitive workflow for Appropriate Use Criteria (AUC) scoring
- Cardiology MIPS dashboard to document required data elements for the most common and complex cardiology measures
- Disease monitoring and notifications to help track patients' congestive heart failure, hypertension, and more
- Single-click copy forward functionality for side-by-side workflow comparison of previous to current encounters
- Flexible documentation to accommodate individual workflows within your practice, including quick-save templates, voice recognition, free text, and digital pen technology

Practice Management

The integration of the practice management system with the EHR improves day-to-day operations significantly.

An integrated platform helps:

- Lower IT overhead with single database management
- Share demographic data and reduce double entry
- Conduct HIPAA-compliant MPI searches for patients from other practices
- Support a single chart while securing practice financial data

Secure every dollar you earn

More than just billing and collections, financial management encompasses all functions that effectively capture revenue at the lowest cost.

- Provide an informative check-in and billing experience for patients
- Automate charge creation and create custom coding rules
- Maximize financial performance with clean claims and A/R management
- Capture everything you've earned with customized contract audit and recovery
- Identify the root causes of why claims are underpaid

Get the health data insights you need

Health data insights support your ability to work effectively with other caregivers within and across organizations.

- Access and share patient information seamlessly through a national data exchange
- Access clinical data with easy-to-activate plug-and-play APIs for easy data exchange
- Consolidate data from disparate systems for a single source of truth across your community
- Provide optimal care and remain independent, thanks to support from cost-efficient interoperability

NextGen Healthcare RCM clients average a 98% first-pass clean claims rate.¹

The standard best-practice clean claims rate is 80%.

Digital front door and care anywhere

An intuitive patient portal provides a 'digital front door' that makes it easy for patients to engage with your practice and take charge of their health.

- Empower patients to engage with your practice via a robust patient engagement platform
- Improve revenue collection with flexible, automatic payment options
- Strengthen patient-provider relationships with virtual visits integrated with your EHR and PM systems
- Use remote patient monitoring to improve outcomes for patients with chronic care conditions
- Decrease staff time spent on tedious tasks and reduce no-shows with online patient self-scheduling, appointment reminders, bill pay, and Rx refill requests
- Reduce waiting room time by enabling patients to confirm personal information, complete intake forms, and provide insurance information online before the appointment

NextGen Healthcare has enabled more than 3.5 million virtual visits since the start of the pandemic.

of consumers want to pay their medical bills electronically²

Enjoy peace of mind

Keep your data as secure as possible—with third-party certification from the Health Information Trust Alliance (HITRUST) and Amazon Web Services. Managed cloud services reduce the stress of keeping pace with technological change.

Provide quality care with exceptional efficiency from one vendor you can trust.
