

DATA AGGREGATION AT SCALE

NextGen® Health Data Hub | NextGen® Health Data Hub Insights

Cost-effective cloud-based data aggregation solution

NextGen Health Data Hub (HDH) ensures reliable systemwide connectivity and empowers data-driven innovations for healthcare information and delivery organizations.

TAME RIVERS OF DATA TO OPTIMIZE CLINICAL OUTCOMES

MANAGED DATA STREAMS FROM

5,280
DATA SOURCES

Demonstrates the breadth of source connections, variety of standards, and data conformance.

PROCESSED

2.68B
TRANSACTIONS

Reveals volume coming in/out of NextGen Health Data Hub (Enterprise API scale).

GENERATED

337M
AUTOMATED DATA SHARING EVENTS

Highlights capabilities to support client-defined data sharing rules and enable direct integration with providers' systems.

CONNECTED TO

1,245
EXTERNAL CLINICAL SYSTEMS

Shows how the solution brings national data exchange networks and data sharing partners together to improve clinical outcomes.

A MODERN DATA WAREHOUSE

NextGen Health Data Hub Insights is a data analysis and reporting data cloud-based solution that supports care delivery models overwhelmed by mountains of data. Made possible through a partnership with Snowflake and phData, NextGen Health Data Hub Insights has helped healthcare organizations **prepare analytics data sets for more than 14 million patients over a five-month period.**

This consisted of more than:

400
MILLION

encounters records

430
MILLION

laboratory results

450
MILLION

documented conditions, procedures, and medications

Your data can make a difference in delivering **optimal outcomes.**

As market demand grows for robust data sharing, aggregation, and data management, **NextGen Health Data Hub** and **NextGen Health Data Hub Insights** provide comprehensive, continuous access to patient health data. They work together to normalize data sets across disparate systems to create consumable and actionable content.
