

MOBILE DICTATION AND VIRTUAL SCRIBE

Document the way you want and save time

Solution description

Using the NextGen® Mobile platform that runs on both smartphones and tablets, physicians can enhance their documentation using the fastest and most accurate input device—the physician’s own voice. Based on the needs and preferences of the individual clinician, documentation can be created using voice-to-text, medical transcription, and/or virtual scribe.

What this solution enables

Combining the portability and simplicity of a smartphone app with the speed and accuracy of dictation, NextGen® Mobile alleviates the strain of documentation.

- Access your real-time schedule and patient charts 24/7 using your smartphone
- Document in the method that works best for you, using a combination of dictation and desktop/laptop EHR workflows
- Let our team of transcriptionists and remote scribes handle your EHR heavy lifting
- Tap and go to get started—which means no cumbersome login or VPN to slow you down

Cost Optimization

Revenue Maximization

Quality Improvement

Adoption Effort

Low

Impact

What does this mean for your practice?

- Reduce physician fatigue through virtually assisted documentation
- Achieve operational excellence through increased documentation speed
- Increase patient satisfaction due to more physician eye-to-eye time

“The answer to physician burnout is the strategic use of EHR technology, combined with a strong mobile offering that allows most physicians to complete their work on a mobile device.”

Karen Clark, Chief Information Officer
