

ADAPTIVE WORKFLOWS AND SPECIALTY CONTENT

Tailored clinical workflows for your most demanding physicians

Solution description

Our electronic health record (EHR) offers unique workflows and tools for all major specialties, developed with our ambulatory care clients for more than 15 years. We also offer an unparalleled ability to customize clinical workflows, allowing you to build and create content for what matters most to your practice.

What this solution enables

The heart and soul of our EHR is our Adaptive Content Engine (ACE) that delivers tailored clinical workflows and includes numerous specialty-specific nuances that often get overlooked.

Take advantage of our standard library of more than 2,000 clinical workflows in 30 specialties, and then further customize any workflow to make it your own.

You can safely modify our standard content to support the unique clinical or financial needs of your group, without affecting regulatory compliance or standardized reporting.

Impact

What does this mean for your practice?

- Keep your start-up costs low with our robust, standardized content libraries that enable a “quick start” across a broad range of specialties.
- Personalize your workflow without depending on us or expensive consultants.

“NextGen® Adaptive Content Engine has some really great enhancements, particularly dermatology content that we’ve been able to customize.”

Chris Ringler, CEO
Ironwood Dermatology
