

# RULES-BASED CHARGE CREATION

Automate charge creation and create custom coding rules

## Solution description

The NextGen® Charge Review Rules Engine delivers millions of coding rules prior to the import of charges into the practice management system. The rules engine includes industry standards, specialty-specific rules, and the ability to develop custom edits to suit your practice's unique needs. The end users can also set the rules to automatically correct the coding errors prior to billing.

## What this solution enables

The rules-based engine delivers real automation. It cleans the data on the front end—prior to entry into the billing system—resulting in zero defect claims.

- Accelerates the speed and accuracy of turning charges into revenue
- Enables simple rule customizations
- Delivers unprecedented auto-correction capabilities

## What does this mean for your practice?

- Reviews and corrects charge data automatically prior to submitting to the NextGen® Enterprise PM system
- Accelerates cash flow by correcting routine billing issues and delivering the charges in a clean, claim-ready state
- Reduces labor costs through automation and efficient workflow
- Captures missed revenue through improved billing accuracy and identifies procedures routinely billed together

“NextGen has designed ways to make it easy and efficient for our clinicians to stay on top of billing rules and maximize our reimbursement.”

A. Bond,  
Director of Billing Services, Athletico
