

# RISK STRATIFICATION AND GAPS IN CARE

Integrated solutions offer insights at the point of care for better outcomes

## Solution description

NextGen® Population Health solutions provide risk stratification of your patient population, help identify gaps in care, and provide patient outreach tools. Our integrated solutions enable care managers to target the highest priority patients for care team interventions, notify patients of care gaps, and improve population health management. Because our population health offering is integrated with your EHR solution, you can easily access your patient's gaps in care, risk stratification, and summary profile while in your clinical workflow, and quickly select patients for outreach campaigns.

## What this solution enables

- Identify the highest risk patients that have the potential to impact your quality and financial performance and prioritize targeted patient outreach. Multiple risk algorithms are applied with especially deep integration of the Johns Hopkins ACG System.
- Seamless identification of gaps in recommended services along with proactive patient outreach tools to improve performance on quality measure incentives and identify immediate fee-for-service revenue opportunities by closing gaps in care.
- Vendor-agnostic integration of analytic insights and patient risk stratification at the point of care within the EHR workflow drive efficient care gap closure and care management interventions.

Impact

## What does this mean for your practice?

- Grows fee-for-service revenue and improves performance on value-based payment quality measure incentives
- Enables the transition to value-based care—whether you're in the earliest stages of quality measure reporting, in a gain-sharing arrangement—or taking on risk and fully accountable care coordination

“Population health helps us get the patients that are at risk in front of our physicians.”

Ryan Geiler, Assistant Clinical Manager,  
Community Medical Center—  
Family Medicine Clinic
