Cost-effective cloud-based data aggregation solution
NextGen® Health Data Hub (HDH) ensures reliable systemwide connectivity and empowers data-driven innovations for healthcare information and delivery organizations.

DATA AGGREGATION AT SCALE

Your data can make a difference in delivering optimal outcomes.

As market demand grows for robust data sharing, aggregation, and data management, NextGen® Health Data Hub and NextGen® Health Data Hub Insights provide comprehensive, continuous access to patient health data. They work together to normalize data sets across disparate systems to create consumable and actionable content.

Your Better Starts Here

Join the more than 100,000 providers across the United States who use solutions provided by NextGen Healthcare to achieve their goals.

Contact us at 855-510-6398 or results@nextgen.com.

BETTER STARTS HERE

NextGen Healthcare manages connections to all EHRs and data sources.

Data warehousing, normalization, and sharing.

Integrates and synchronizes data from all EHRs and data sources.

Data governance and policy.

Data aggregation and normalization.

TRANSDUCES THE BREADTH OF SOURCE CONNECTIONS, VARIETY OF STANDARDS, AND DATA CONFORMANCE.

Highlights capabilities to support client-defined data sharing rules and enable direct integration with providers’ systems.

Demonstrates the length of secure connections, reliability of standards, and conformance.

Removes volume and increases impact of NextGen Health Data Hub (Enterprise API scale).

A MODERN DATA WAREHOUSE

NextGen® Health Data Hub Insights is a data analysis and reporting data cloud-based solution that supports core delivery models overwhelmed by mountains of data. Made possible through a partnership with Snowflake and phData, NextGen Health Data Hub Insights has helped healthcare organizations prepare analytics data sets for more than 14 million patients over a five-month period.

This consisted of more than:

400 MILLION encounters records

430 MILLION laboratory results

450 MILLION documented conditions, procedures, and medications

TAME RIVERS OF DATA TO OPTIMIZE CLINICAL OUTCOMES

Integration as a service
