- Ability to test device prior to visit
- On-demand visits

Benefits of Choosing OTTO

Seamless EHR Integration

Virtual Visits integrated with NextGen.

Clean & Simple User Experience

Designed by providers who understand your workflow.

Ease-Of-Use Across All Devices

Easily connect with your patients on any device.

Easy Implementation Process

Efficient and simple implementation, tailored to your needs.

Today in Telehealth

Why Telehealth?

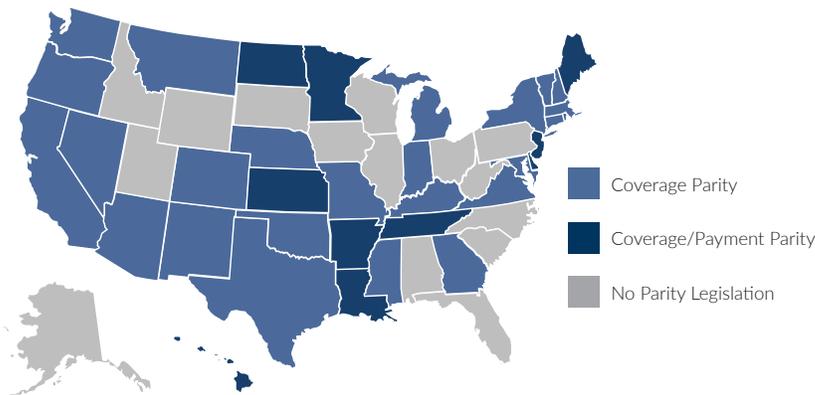

Patients are looking for convenient, quality health care they can trust. Telehealth solutions such as synchronous Virtual Visits connect you with your patients to deliver high-quality virtual care anytime, anywhere, on any device.

Support your practice efficiency by improving patient access and satisfaction while boosting profitability.

Why Now?

- Telehealth parity legislation
- Medicare reimbursement
- Competition with direct to consumer models: Keep your patients in your care

Reimbursement guidelines are in a constant state of change and can vary by state, practice and payer. Let OTTO Health help you navigate the Telehealth landscape.

Interested in using OTTO Health for Virtual Visits with your patients? Contact your NextGen account executive to get started!

Telehealth Use Cases

Increase convenience for you and your patients through cloud-based access on any device, anywhere

Manage and refill medications

Provide virtual follow-up visits

Review lab results, x-rays and ultrasounds

Improve accessibility for patients with limited mobility

Expand patient access to after-hours care

Improve continuity of care

Tomorrow's office visit will increasingly take place everywhere but the office.
